Tor Browser is the only browser built on a secure, privacy-respecting platform. It's a free, open source, cross-platform, pluggable, and extensible browser with automatic anonymity. We hope Tor Browser will inspire to create more secure, privacy respecting, free and open source software, systems and services. Tor Browser aims to protect you by keeping you anonymous and secure on the Internet. Highlights: * New Tor Launcher: Users can now launch Tor Browser from their desktop menu. * Support for Tor Browser on Mac OS X: Users can now download and use Tor Browser for Mac on Mac OS X 10.7 or later. * Protections against fingerprinting and IP leaks: Tor Browser now rejects connections from known fingerprinting and IP leak domains. * HTTPS Everywhere: Tor Browser now handles mixed content more intelligently. We are now using an HTTPS connection whenever available. * Privacy Badger updates: Tor Browser now automatically disables or rewrites third-party JavaScript and CSS. * Support for Tor Browser on Windows 8: We now support Windows 8. * Upgrades to Tor Launcher: We now support downloading to and launching from USB drives. * IPv6 support: We now use a newer Tor protocol, and are IPv6-ready. Tor Browser release notes: * * We'd like to thank our upstream developers, contributors, and everyone else who has made this release possible.

Browse With Me

Browse With Me is an Internet browser with a minimalistic design, a speed that is similar to that of internet browsers, a simple look, and a minimal set of features. The only thing that should be in your web browser of choice is speed. Browse With Me claims to be the fastest browser, and we can tell you that the speed is mostly just an illusion, and not really useful when it comes to browsing the Internet. We'll show you what we mean. Sponsored High Speed Internet Service Get your home connected to high speed Internet connectivity.
