form of malware, spyware or adware ICE BAT to make you feel like a king!(What is ICE BAT?: a malware that comes to mind when we speak of tools
designed for Android) ICE BAT is a malware that poses as a tool to change your device's primary color to a warm and authentic color - black. This
application is claimed to be able to change the device's status bar color from white to black or any custom color you want! (Custom - application created
color. When the app is launched it changes the status bar color to a custom color you set. It stays changed until a new status bar color is set.) ICE BAT is a
malicious Android malware which poses as a desktop manager, transfer app, file manager, file organizer, photo editor, gallery, notes, WiFi tethering and
mobile backup app. ICE BAT is a hidden malware which hides itself in a wallpaper application called Fresh Wallpaper, which is an official wallpaper
application of Google. There are over 4.8M users of this wallpapers application. ICB is trying to spread through this fake application through social
engineering. So, the more people see ICE BAT, the more the threat exists and increases. How to Protect from this Malware? If you are running on
Android version 5.0 (Lollipop) or higher version, the app is a dead end. If the application is installed on the device, change its name so that you can
identify it. Additionally, you may be able to block the malicious apps and extensions that can be used for spreading other types of malware. Addigy user:
If you have installed addigy on the device, then you can use this tool to remove ICE BAT:
